

AMERICAN COLLEGE OF HEALTHCARE ARCHITECTS

PRESIDENT AWARD

The ACHA President, with the Board of Regents Approval, may recognize the achievements of one individual or organization that serve the best interests of the American College of Healthcare Architects. Such President Award may be for any reason benefiting the ACHA either by extending public influence about the value of ACHA Board certification; recognizing significant individual achievements toward the end of a non-certificant's career; for significant contributions over one's career toward advancing the art and science of healthcare architecture; or recognizing sustained financial or in-kind contributions of an organization's support of the ACHA.
